-- The MAILING DATE of this communication appears on the cover sheet with the corresponding address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a device with a **microprobe being configured to move substantially freely in three mutually perpendicular directions**, classified in class 604.
- II. Claims 16-30, drawn to a device with a **microprobe being configured to translate in a first direction and rotate substantially freely in plane perpendicular to the first direction**, classified in class 604.
- III. Claims 31-53, drawn to a device having a **flexible tube and a microprobe connected to second end of the flexible tube**, classified in class 604.
- IV. Claim 54, drawn to a fluid delivery device having a **gas generator**, classified in class 604.
- VI. Claim 55, drawn to a fluid delivery device having a **gas generator and a current generator**, classified in class 604.
- VII. Claim 56, drawn to a fluid delivery device having a **gas generator and a pressure relief valve**, classified in class 604.
- VIII. Claim 57, drawn to a fluid delivery device having a **second housing, a diluent reservoir in the second housing, a piston and a powder chamber**, classified in class 604.
- IX. Claims 58-59, drawn to a microprobe, **a sensor and a pump**, classified in class 604.

Art Unit: 3763

- X. Claim 60, drawn to a fluid delivery device having a gas source, a resilient device, an arm, an actuating device and a valve, classified in class 604.
- XI. Claim 61, drawn to a device having a fluid reservoir, a first drive mechanism, wherein the device is configured to prevent the first drive mechanism from being re-actuated until the predetermined amount of the fluid is removed, classified in class 604.

The inventions are distinct, each from the other because of the following reasons:

**Inventions I-XI** are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, **inventions I-XI** have separate utility in view of the structural differences highlighted above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Brian Casler can be reached on 703-308-3552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
